

The transport cases • The plastic parts • Vibration and shock protection

## Transport case for Space Satellite control and signal processing equipment

Armeka was asked to design transport cases for satellite featuring Space Finland technology that offers free data and service from the environment, climate and security in space.

Armeka developed:

Protection solutions with special materials and tested components

Transport cases shielding the satellite from exposure of the environment, e.g. shocks, vibration, dust, moisture etc.

ESD (static electricity discharge)

EMC / EMI (Electromagnetic Radiation)

The case can be taken to EPA protected areas
